

DJI Pocket 3 Traveler Pro Case Manual

Best practice installation is to hold the DJI Pocket 3 BELOW the gimbal head, by the shoulder area. When installing, use a flat surface to mount, and push down with one quick sturdy motion until locked into place.

Best practice removal is to hold the DJI Pocket 3 BELOW the gimbal head, by the shoulder area and pull vertically to remove. Removal can be difficult if locked too tightly, try wobbling by hand. A removal tool is included in case removal is too difficult to perform by hand. Insert removal tool into USB slot and push upwards or lay on a flat surface and push the case downwards onto the removal tool.

NOTE: Occasionally check the seating of the case to ensure it is properly installed at all times. For further assistance, email: support@customcamera.shop
